MANAGED BY

PETROSPOT

ORGANISED BY

**BUNKER
EVENTS LTD**

BunkerExperience presents an unbeatable combination of intensive classroom teaching and real-life bunkering experience.

FOCUSING ON:

- barge operations and sampling
- lab tests and procedures
- bunker quality
- calculations and measurements
- onboard fuel handling
- ship type familiarisation

This all-inclusive three-day course is guaranteed to provide a rock solid intellectual and practical introduction into the three most important hands-on elements of the bunker business.

The morning classroom sessions are geared towards preparing students to make the most of the afternoon ‘real life’ experience of working on a bunker barge, working in a testing laboratory and ‘going to sea’ for close-up views of different types of ships, barges and terminals in Europe’s busiest port.

“ The course was very well presented. Difficult subjects were passed on in a simplified manner, in which it was easily understood

COURSE PROGRAMME

Monday

Welcome drinks at the hotel

Tuesday

- Course registration and breakfast
- Bunkering – why are we here?
- Round Robin – get to meet your colleagues
